

Discreet. Individual. Comfortable.

In-the-ear hearing systems from Audio Service.

Custom-made for you

The ideal solution for maximum discretion.

In-the-ear hearing systems are particularly small and sit directly in the ear canal. As this canal is as individual as a fingerprint, the hearing systems are custom-made for you.

—— Through their positioning directly in the ear canal, in-the-ear hearing systems effectively utilize the function of the concha and support the familiar, natural sound pattern.

Intelligent like never before

—— **Completely inside the ear.**
Miniature masterpieces with cutting-edge high-tech for perfect hearing comfort – they automatically adapt to every listening situation and impress, for example, with Direct Audio Streaming from your smartphone or TV.

Individuality —— The shells are manufactured with micron precision and individually adapted to your ear canal. Depending on the desired functionality, we then insert the required technical components and optimize them for a brilliant hearing experience.

The new in-the-ear hearing systems.

With intelligent G5 technology.

Tiny size – huge sound.
The new Icon G5 models.

Virtually invisible — Confident in every hearing situation: the small microphone and the thinner wall thickness make the Icon G5 Precise the smallest hearing system by Audio Service. This design guarantees maximum discretion. The extended dynamic range of the G5 technology provides an excellent listening experience. The new Icon G5 is a true sound miracle that also scores points with optional wireless and other convenient features.

Just right for any listening situation. The hearing system adapts automatically – during a game, in a conversation or while watching TV.

Small and versatile — Hello family, hello life: ready to enjoy every second! The Sina G5 treats you to excellent sound quality. The optional wireless functionality interconnects your hearing systems, and the programmable push-button is easy to use. The Vega G4 is just as modern and comfortable with higher amplification. Both hearing systems can be optionally controlled via app or remote control.

Ida BT G5 – perfectly connected with maximum listening comfort.

Innovative and unique — The in-the-ear hearing system with Direct Streaming Technology: the Ida BT G5 lets you benefit from all the possibilities of modern connectivity. Enjoy multimedia listening comfort through Direct Audio Streaming via *Bluetooth®*: telephone calls from your smartphone, music or TV broadcasts are transmitted directly to your hearing systems. Your Ida BT G5 hearing systems connect you to the whole world.

Discover the comfortable accessories and all features for convenient customization.

Smart Key
The remote control for straightforward setting of programs and volume even without wireless functionality.

Smart Mic (for Ida BT G5)
The Smart Mic enables Audio Streaming from any Android smartphone.

Smart Remote app
The app for direct control of default settings such as program selection, volume and battery status of your Audio Service hearing systems.

Smart Direct app (for Ida BT G5)
Once installed on the smartphone, the Smart Direct app becomes a remote control for your hearing systems – allowing you to directly transmit phone calls or streamed music.
