## Mood Li-Ion G5

**Multimedia-connected, super long-lasting!** — The Mood Li-Ion G5 connects wirelessly to your smartphone, TV, or HiFi device. No more tedious battery changes, because the lithium-ion battery provides lasting power. With the new G5 technology, the Mood Li-Ion G5 adapts to every hearing situation, every person in the conversation and your own voice. That sounds great, you'll say. And it just keeps going and going – thanks to the powerful lithium-ion battery.

# I'm in the MOOD.

Smart networking with a powerful rechargeable battery – the Mood Li-Ion G5.

**Networking via Bluetooth®** — G5 technology turns your Mood Li-Ion G5 into wireless high-tech headphones: phone calls, music or GPS instructions are streamed directly from the iPhone to the hearing system, while Android supports the Smart Mic. The optional Smart Transmitter 2,4 simply connects your G5 hearing system to your TV or HiFi device with no additional accessories.

**No battery changes required** – the lithium-ion battery provides extra-long battery life and is environmentally friendly.

**Modern lithium-ion technology** — Your Mood Li-Ion G5 ensures brilliant sound quality with full streaming performance. For up to 19 hours! After a conveniently short inductive charging time of 30 minutes, the battery is ready for another 7 hours. A full charge takes 4 hours. This is also great for the environment, because battery changes are completely eliminated.

**State-of-the-art sound control** — Good communication is key! The Mood Li-Ion G5 intelligently adapts to every hearing situation. It activates the all-around perception feature or focuses on your main conversation partner, even in difficult conversational situations. In addition, the Mood Li-Ion G5 learns the tone of your own voice and ensures that your voice sounds as natural and pleasant as possible.

**The G5 generation**  
Optimally connected for maximum hearing comfort.

**Pretty smart.**  
And as individual  
as you.

#### Smart Li-Ion Power

As soon as the hearing system with lithium-ion battery is placed in the charging station, the charging process starts. The hearing system is dried in the process.

#### Smart Mic

The Smart Mic enables Audio Streaming from any Android smartphone.

#### Smart Direct app

Once installed on the smartphone, the Smart Direct app becomes a remote control for your hearing systems – allowing you to directly transmit phone calls or streamed music.
