Good company offers comfort.
Perfect company sets new benchmarks.

The new Sun G5 knows your world and wants to experience it together with you. Digitally connected and individually configurable, it accompanies you wherever hearing is truly important. Whether it's making calls on your iPhone, taking trips with the navigation app, or an evening spent watching TV with friends: The Sun G5 Direct Streaming technology makes not only conversations in complex hearing situations but also movies and music a great source of entertainment. Ask your hearing system specialist today. Your best companion is waiting for you.

G5

The G5 generation
Optimally connected for
maximum hearing comfort.

A NEW CONNECTION.

The new Sun G5 allows you to connect directly with everything you require on a daily basis.

- + Direct Audio Streaming
- + Comprehensive functions
- + Convenient app

MY DAILY ROUTINE: PERFECT BALANCE.

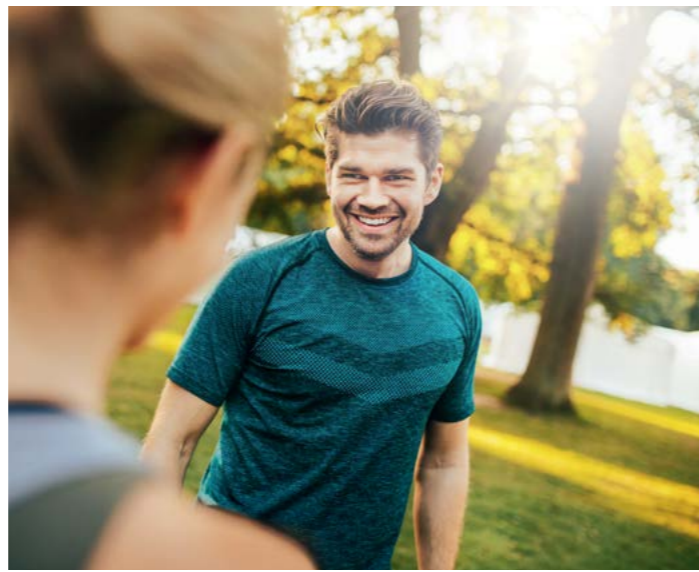

My Sun G5: Maintains the balance.

A natural hearing experience is down to the available technology, not your surroundings. The constant communication between your left and right hearing systems means your world now sounds balanced and comfortable.

During conversations, your hearing systems work together to evaluate all of the signals received and thus ensure a spatial hearing impression – maintaining the focus on the main person you're talking to all the while.

AudioLink
For direct streaming and harmony between the hearing systems.

MY LIFE: ALWAYS ON THE GO.

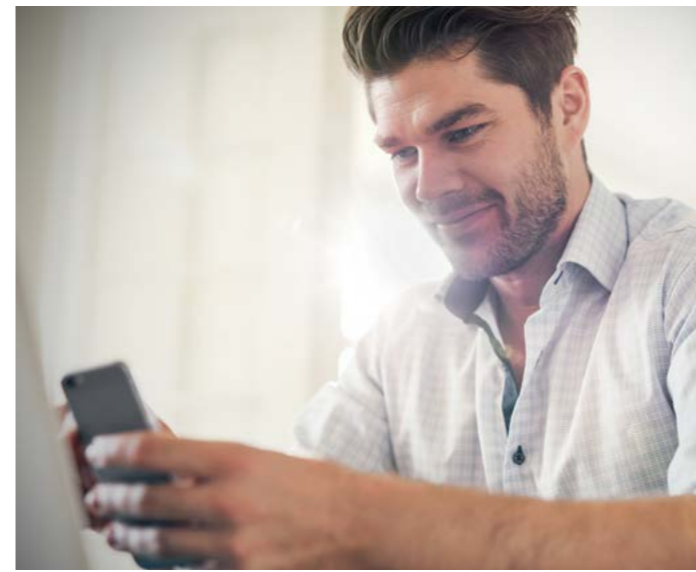

My Sun G5: Goes with me.

Whether it's walking, jogging, or cycling: Only the right companion can ensure you reach your destination. The Smart Direct app unites your Sun G5 and the smartphone motion sensors in a new partnership.

When your smartphone detects that you are moving, the Sun G5 activates the omnidirectional focus. This allows you to hear ambient noises at all times.

MotionSense
For the right focus at every turn.

MY WORLD: OPTIMALLY CONNECTED.

My Sun G5: Directly connected.

The best entertainment starts in your ear: Telephone calls, music, and navigation instructions are transformed into a true hearing experience by the combination of your iPhone and the G5 Bluetooth® technology. The signals are streamed directly to your hearing system – a particularly convenient solution for you.

In addition, the Smart Transmitter 2,4 connects your Sun G5 to your TV or HiFi system quickly and simply – all without the need for any other devices.

Direct Audio Streaming
For the direct link between your Sun G5 and everything that's important to you.

MY CONVENIENCE: THE SMART DIRECT APP.

Hearing pleasure that suits my tastes.

In collaboration with your iPhone, the Smart Direct app makes your hearing experience more convenient than ever before. Once installed, the app transforms the Sun G5 into stereo headphones. Telephone calls and streamed music are forwarded from your iPhone directly on to the hearing systems – without any additional accessories.

In addition, the hearing program, volume, and alerts can all be set and customized particularly easily with a smartphone using the Smart Direct app. For optimization of your hearing, the app creates a personalized environment profile for you, which provides you and your hearing system specialist with information on your daily hearing performance.
